

# DBM-Fatigue

A smartphone app for cancer patients

## We are looking for cancer patients to:

- Help create a tool that Doctors can use to personalize cancer treatment plans
- Help us identify early changes of your health by monitoring symptoms such as fatigue from your iPhone and Apple Watch
- Make a difference from wherever you are and receive \$100 for your time

## Requirements for participants

- Diagnosed with cancer and are currently receiving chemotherapy or will be starting within the next 3 weeks
- Own an Apple iPhone and an Apple Watch
- Are an adult 18 years or older, living in the USA
- Can speak, read, write in English.
- Have a smartphone and data plan that allows for app installation and usage.

If you are interested in participating in this study, please visit our website at

<https://hs.medable.com/dbm-f-study>

- You will receive information about the project.
- You may have your questions answered before you download the app and agree to participate.
